Division of Enrollment and Access Results Employee Climate Survey Results 2018

The 2018 CSU Employee Climate Assessment is a biennial assessment conducted in the fall to assess employee perceptions related to their department/unit, division/college, and CSU. The full assessment comprises three main components: the survey, focus groups, open forums, and open ended results.

This sub report focuses on the results of the survey component of the assessment for Enrollment and Access. Please visit the 2018 Employee Climate Survey website for the complete university report, specialized reports, the focus group report, the open end analysis, links to past results, and presentations.

The 2018 instrument focuses on the following employment themes: culture, sense of belonging, respect, favoritism, accountability, misconduct, bias incidents, feedback on employee councils, Principles of Community usage and awareness, freedom of speech, and CSU and department perceptions. All of these items were asked on a five-point Likert scale (1 = Strongly Disagree, 2 = Disagree, 3 = Neither Agree nor Disagree, 4 = Agree, 5 = Strongly Agree). Only select findings are covered in this report.

For the purposes of this report division refers to the Division of Enrollment and Access and "agreement" is defined as a respondent selecting either "Strongly Agree" or "Agree" on the Likert scale. Agreement is generally reported as the proportion or percent of respondents providing the combination of these responses. When a mean (average) score is reported, it is based on this 1 to 5 scale. Generally, with exceptions such as Favoritism, the higher the mean score, the more favorable the rating.

On many of the survey items, respondents could chose a non-evaluative response such as "Don't know/NA" or "Prefer not to disclose." These responses, along with missing data, have been excluded from all analyses.

Data are reported only when there is a large enough response pool (number of respondents to a survey item) to ensure respondent anonymity. Any potentially identifying data has been kept confidential and will not be reported.
