

On November 16, 2015, Colorado State University students submitted a series of recommendations to the administration in conjunction with a student-organized demonstration on campus.

- 1. We recommend that the University create a strategic five-year plan for increasing diverse populations and meeting the other recommendations with a select board of diverse students and faculty to vet, maintain, and oversee the process.**
- 2. We recommend that the university significantly increase the percentage of racially diverse faculty and staff.**
- 3. We recommend increased funding and resources for the SDPS offices and increased funding resources for mental health issues specifically dealing with racial oppression and racial battle fatigue.**
- 4. We recommend a campus-wide curriculum change to require Introduction to Ethnic Studies and Introduction to Women Studies to be taken by all students. Additionally, we recommend the inclusion of Women Studies courses in the Global and Cultural Awareness category of the AUCC as it currently is not included.**
- 5. We recommend the creation of diversity representative positions in the student government (ASCSU) senate and on the Faculty Council.**
- 6. We recommend the increased focus on resolving the problems facing graduation rates for athletes of color and lack of post-graduate opportunities.**
