

Employee Climate Survey 2021

Vice President of University Operations

The 2021 CSU Employee Climate Survey is a component of a biennial assessment conducted in the fall to assess employee perceptions related to their department/unit, division/college, and CSU. The 2021 is based on the survey developed in 2018 by the Assessment Group for Diversity Issues, a CSU service committee. The 2021 instrument focuses on employment themes of culture, leadership accountability, respect, favoritism, communication, discriminatory attitudes, and performance review.

Most items use a five-point Likert scale (1 = Strongly Disagree, 2 = Disagree, 3 = Neither Agree nor Disagree, 4 = Agree, 5 = Strongly Agree). Tables appearing in Frequencies of Results show the complete set of survey frequencies by theme (e.g., Work Culture, Performance Review, Leadership Accountability, etc.) as well as the total (weighted N). On many of the survey items, respondents could choose a non-evaluative response such as "Don't know," "NA" or "Prefer not to disclose." These responses, along with missing data, have been excluded from all analyses. Subgroup comparisons by gender, minoritized status, and employment type are based on the proportion of respondents who "strongly agree" or "agree" with each item and statistically significant differences ($p < .05$) between subgroup members are noted within the tables. Additionally, an overall index score representing the average percent agree (e.g., Work Culture Overall) appears within each table. For example, the Work Culture theme includes 13 individual survey items. If an employee selected "agree" or "strongly agree" to 9 out of the 13 items, their Work Culture index score would equal 69%. An employee must have answered all survey items within a theme in order for an index score to be calculated. An overall index score represents the average of the individual index scores or all employees included in the group or category.

Table 1 displays the total number of employees contacted for the survey, the number of employees that responded, and the response rate.

Table 1: Response Rates by Department/Unit

	Sent	Bounce	Opt-out and refusal	Completed	Response rate*

* Response rate = Completed / (Sent - Bounce)

When the proportions of a demographic subgroup in the survey sample differ substantially from known population proportions and when members within a subgroup may meaningfully diverge on variables of interest, data weighting can provide a more accurate summary of the true population response than simple averaging. For the 2021 survey, representation by gender, racially minoritized status, and employment type were compared to known population norms, and weighted to balance any discrepancies. Additionally, a secondary weight was applied to increase the sample n to approximate the total number of employees in the division or college at the time of the survey's administration. Results of the weighting scheme are displayed in Table 2.

Table 2: 2021 Employee Climate Survey Weighting Results

		Division population norm	Unweighted survey sample	Weighted survey population
Respondent gender	Man	66%	61%	64%
	Woman	34%	35%	33%
	Trans, nonbinary, nonconforming (T/NB/NC)	.	4%	4%
Racially minoritized status	Racially minoritized	22%	23%	23%
	Non-racially minoritized	78%	77%	77%
Employee type	Admin Professional	23%	28%	22%
	Contract, continuing, and adjunct (CCA)	0%	0%	0%
	Tenure or Tenure-track (T/TT)	0%	0%	0%
	Faculty	0%	0%	0%
	State Classified	77%	72%	78%
	Other Salaried Employee	0%	0%	0%

Results are weighted by gender and employee type.

Frequencies of Results

The following tables display the complete set of frequencies for each survey question asked on the survey. Percentages and proportions of respondents providing a given response are abbreviated to "Pct" and the number of respondents representing the total weighted division population are also provided under the abbreviated heading of "Pop."

Table 21: Gender Scales

Gender is often not easily captured through categorical measures. Gender is much more complex and nuanced. In an attempt to understand this complexity and how various genders experience the campus, we are using these scales to measure how individuals view themselves. Scaled measures of gender, as seen below, are also an attempt to understand the experiences of all genders on campus. In general, how do you see yourself? Comparisons by Gender

The gender of respondents is based on responses to the multiple response gender survey question (Table 20). If a respondent selected "Man" alone or in combination with "Cisgender," they are coded a "Man." Similarly, if a respondent selected "Woman" alone or in combination with "Cisgender," they are coded as "Woman." If a respondent selected any combination of "Agender," "Non-binary/Gender Queer/Gender Non-Conforming," "Trans/Transgender," "Trans Man/Masculine," "Trans Woman/Feminine," and/or "Two Spirit" they are coded as "Trans, non-binary, or non-conforming" (T/NB/NC). Gender could not be determined for respondents who skipped the question or selected "Prefer not to disclose;" these respondents are excluded from these analyses.

1. Results are based on two-sided tests assuming equal variances. For each significant pair, the key of the smaller category appears in the category with the larger mean. Significance level for upper case letters (A, B, C): .05

2. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.

3. Cell counts in some subtables are not integers. They were rounded to the nearest integers before performing pairwise comparisons.

Comparisons by Racially Minoritized Status

Racially minoritized status is based on responses to the multiple response race and ethnicity survey question (Table 22). If a respondent selected only one race and that one race was Asian, Black, Hispanic or Latinx, Native American or Alaska Native or First Nations, or Native Hawaiian or Other Pacific Islander, or they selected "The race/ethnicity I most closely align with is not listed," they are coded as racially minoritized. If a respondent selected one race and that one race was White, they are coded as non-racially minoritized. If a respondent selected more than one race in any combination, they are coded as racially minoritized. Racially minoritized status could not be determined for respondents who skipped the question or selected "Prefer not to disclose;" these respondents are excluded from these analyses.

Results are based on two-sided tests. For each significant pair, the key of the category with the smaller column proportion appears in the category with the larger column proportion.

Significance level for upper case letters (A, B, C): .05^{1,2}

1. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.

2. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

Comparisons by Employee Type

Employment type is based on the employee's current classification within the Human Resources system. State Classified (SC) employees are those with positions within the State Personnel System under Colorado statutes. Administrative professional (Admin Pro) employees hold positions exempt from the State Personnel System under Colorado statutes and are not faculty positions. Research Associates and Research Scientists are considered Admin Pro. Faculty includes all personnel who carry academic rank (professor, associate professor, assistant professor, master instructor, senior instructor, instructor, and faculty affiliate) and the University President. Faculty have been coded into two groups. Tenure and Tenure Track (T/TT) faculty include tenured faculty, tenure-track faculty, and faculty with transitional appointments. Contract, Continuing, and Adjunct (CCA) faculty include contract faculty, continuing faculty, and adjunct faculty as well as faculty with temporary, special, and/or senior teaching appointments. As employment type was included as part of the survey sample meta data (and not asked on the survey), employment type could not be determined for employees who completed a hard copy survey. These employees as well as other salaried employees are excluded from these analyses.

The reported population reflects the number of respondents who answered the survey item.^{1,2,3}

1. Results are based on two-sided tests assuming equal variances. For each significant pair, the key of the smaller category appears in the category with the larger mean. Significance level for upper case letters (A, B, C): .05

2. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.

3. Cell counts in some subtables are not integers. They were rounded to the nearest integers before performing pairwise comparisons.

Asked only of those respondents who had a performance review in the last year.

Percent "Agree" or "Strongly agree"

The reported population reflects the number of respondents who answered the survey item.

*Reverse coded when included in overall rating

a,b,c

a. Results are based on two-sided tests assuming equal variances. For each significant pair, the key of the smaller category appears in the category with the larger mean. Significance level for upper case letters (A, B, C): .05

b. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.

c. Cell counts in some subtables are not integers. They were rounded to the nearest integers before performing pairwise comparisons.

Percent "Agree" or "Strongly agree"

The reported population reflects the number of respondents who answered the survey item.^{a,b,c}

a. Results are based on two-sided tests assuming equal variances. For each significant pair, the key of the smaller category appears in the category with the larger mean. Significance level for upper case letters (A, B, C): .05

b. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.

c. Cell counts in some subtables are not integers. They were rounded to the nearest integers before performing pairwise comparisons.

Significance level for upper case letters (A, B, C): .05* Values reported for items with n >= 3.^{2,3}

1. This category is not used in comparisons because its column proportion is equal to zero or one.

2. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.

3. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

Comparisons by Year

In order to yield meaningful longitudinal comparisons, the 2018 survey sample was weighted using similar methods as 2021. Consequently, 2018 results will not match prior reports because of this methodological adjustment. Only survey items asked in both 2018 and 2021 are presented in the following tables.

Percent "Agree" or "Strongly agree"

The reported N reflects the number of respondents who answered the survey item.^{1,2,3}

1. Results are based on two-sided tests assuming equal variances. For each significant pair, the key of the smaller category appears in the category with the larger mean. Significance level for upper case letters (A, B, C): .05

2. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.

3. Cell counts in some subtables are not integers. They were rounded to the nearest integers before performing pairwise comparisons.
