Demographic Questions

- Expanded our demographic questions for the 2021 survey to include follow up questions regarding race/ethnicity and gender identity
- These questions are helping to inform the work done by the disaggregating race/ethnicity committee
- Intersectionality report forthcoming
- Added a question on identifying as a person with a disability
- Added a question about identifying in the LGBTQIA+ community
Data Collection

• Administered via Qualtrix in Fall 2021 to all CSU employees

• Embedded data included employment type, college/division, department/unit; anonymous

• Survey available in Spanish and English (both web-based and paper hard copy)

• <15 minutes to complete

• Results are reported in aggregate and no identifying information reported; confidential
Sample Weighting

• Weighting was used to ensure that sample demographics align with known population parameters.

• Gender, racially minoritized status, college/division, and employment type were used to weight the overall results.

• College/division reports were weighted by racially minoritized status, gender, and employment type as needed.

• For comparison purposes, 2018 results were also weighted in the 2021 report.
Reporting Standards

• Questions on organizational themes were in a 5 point-likert scale- strongly disagree, disagree, neither agree nor disagree, agree, strongly agree.

• Summarize organizational themes with a percent agreement.

• Reports include the response distribution per item as well as cross tabs by gender, employee type, and racially minoritized status at the overall level and the college/division level.

• Department level reports are available by request.

• Reports show weighted sample size…n’s.

• Statistical tests are provided in the data tables, today’s presentation focuses on average percentage agreement across organizational themes.

Key Findings for the Division of Information Technology

• Compared to CSU overall, the Division of Information Technology had higher average agreements across all organizational themes in 2021. Agreements were the lowest around division/unit leadership accountability, with reported percentages of approximately 50%.

• Compared to college/division overall, men had favorable results across all themes, particularly regarding work culture and department/unit climate. Transgender, nonbinary, nonconforming (T/NB/NC) and women reported lower percentage of agreements in nearly all themes (except for respect).

• Compared to college/division overall, non-racially minoritized and state classified employees reported lower percentages of agreements in nearly all themes in 2021, particularly around division and department/unit leadership accountability. Both racially minoritized and state classified employees reported extremely high agreements regarding favoritism in the division, which was undesirable.

• When looking at perceptions over time for the division of Information Technology, we found a decrease in average agreements in nearly all themes between 2018 and 2021, except for the results showing that IT retains diverse employees.

• The results showed a significant decrease in reported discriminatory attitudes in nearly all themes in 2021 compared to 2018.

• Additionally, there was a decrease in nearly all problematic behaviors in the division in 2021 compared to 2018. However, the percentage agreements for problematic behaviors related to bias remained relatively high in 2021.
